

Lesson #10 Inequalities (PR4)

Drawing solution sets on number lines

Continue to work at your own pace please. It's all about understanding and not about speed. And... sometimes you will have less time than others, so do what you can. Friday, we will touch base and note where you are. 😊

Today, I made the video! It will be just like the old days when we were in class together! My kids know that I am NOT Mr. Hopper (who you know is always coming to my rescue when I have technology issues). As a first time youtuber (under Mr. Hopper's instruction), my lesson is not perfect but keep in mind this online learning is just as new to me as it is to you! 😊 ***There is a glitch... we lose volume at the 7-10-minute mark but that's no big deal because all I really say there is copy this into your notebook as page 51. So... when it goes mute make sure to copy the handwritten notes in your notebook (Real numbers, tricks and 2 examples).

Miss you all and wishing you all well.

Mrs. Hayes- O'Hara and Mr. Hopper.
