

Lesson 32

Line Symmetry (Reflections)

SS5: Demonstrate an understanding of line and rotational symmetry.

I tried something new! I thought I could show a YouTube clip during my lesson, much like I would have done in class. Unfortunately, it does not record in smart notebook. You will see where this happened in my lesson **at the 13:39-16:20 minute mark**. It is only quiet for less than 3 minutes. Sorry! Live and learn!

Lesson learned! 😊 Virtual Learning has a steep learning curve for students and teachers! 😊

1. **Here is today's lesson about LINE SYMMETRY, better known as Reflections.**

<https://youtu.be/FlbmdbS0Uo>

2. **Here is the quick video I tried to include in my lesson (the one you couldn't hear at the 13 minute mark.**

http://www.youtube.com/watch?v=j1X_UIOvEwA&feature=related

Should you ever have any comments, questions or concerns, know that I am only an email away. 😊 Continue to push yourself! You are almost done this course! This outcome and one more and then you will have studied EVERY outcome in the grade 9 Math curriculum!
